Product Description

Titanium target

High-purity and high-density sputtering targets include:

Sputtering target (purity: 99.9%-99.999%)

Titanium target Titanium sputtering target material Used for liquid crystal display, laser memory, electronic controller, sputtering thin film material, semiconductor integrated circuit, solar photovoltaic, recording medium, flat display and surface coating of workpiece

Titanium target Titanium sputtering target material Used for liquid crystal display, laser memory, electronic controller, sputtering thin film material

Titanium target Titanium sputtering target is used for semiconductor integrated circuit, solar photovoltaic, recording medium, flat display and workpiece surface coating

Material:	Pure titanium Gr. 1
Application:	Titanium target Titanium sputtering target material Used for liquid crystal display, electronic controller, sputtering thin film material, semiconductor integrated circuit, solar photovoltaic, recording medium, flat display and surface coating of workpiece
Purity:	99.96% - 99.99%
Custom made:	support
Tolerance:	+/-0.05mm
Shape:	round target, rectangular target

Usually we will provide a quality inspection report like this with the goods, which shows the chemical composition and physical properties
