Product Description

Grade 1 Grade 2 F67 Ti Rod ASTM F136 Gr5Eli Titanium Rod Medical Ti6al4v Titanium Round Bar

Strong temperature resistance ASTM B348 round shape OD20mm pure titanium rod for Bending workpiece

Industrial titanium bar use:

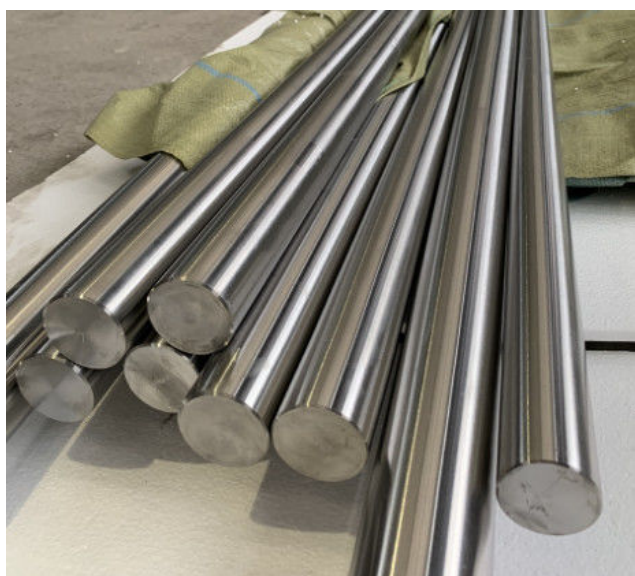

ASTM B348 (Grade 1-38)

Medical titanium rod use:

ASTM F67 (Grade 1-4), ASTM F136 (Grade 5, Grade 23)

Military and Aerospace titanium bar titanium rod use:

AMS4911/4928 (Grade 1-38)

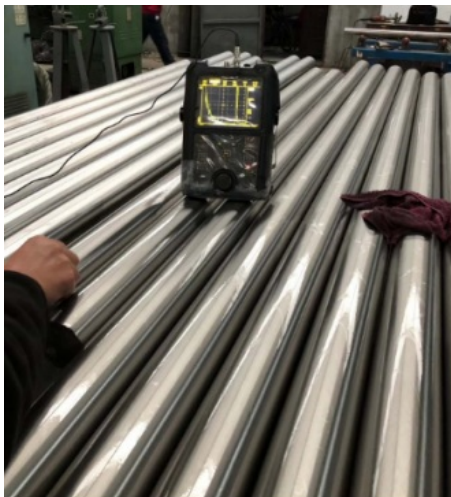

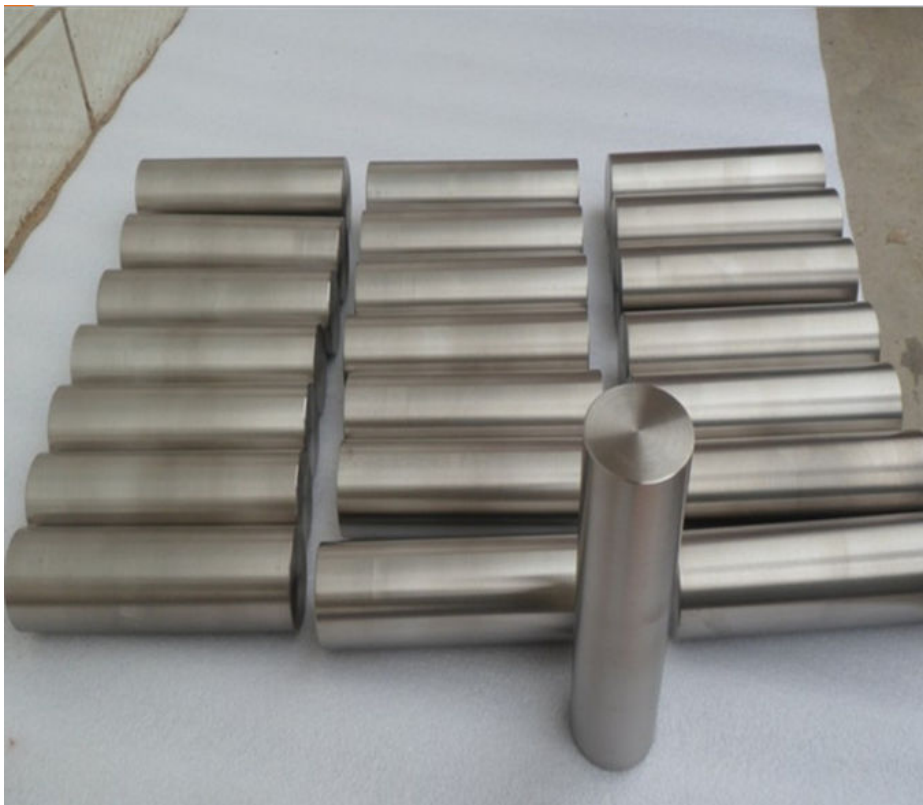

Titanium grade 2 Bar/Rod

Standard: ASTM F67 ASTM F136, ASTM B381, AMS 4928 Grade: Gr1, Gr2, Gr3, Gr4, Gr5, Gr7, Gr9, Gr12, Gr23

Dimension: Dia3.0-325*L<6000mm

Surface: Acid pickling surface, Polished surface, Machined surface

The advantages of using titanium and titanium alloys mainly include the following:

1. Light weight
2. Low elastic modulus
3. Non-magnetic
4. Non-toxic
5. Corrosion resistance
6. High strength, good toughness
