Product Description

Customize Titanium Clad Copper for Electrolysis Electroplating Hydrometallurgy Metal Anode Electrolyzer

High-quality Pure Ti Cladding Material Industrial Titanium Clad Copper Bar
For Electroplating

Titanium copper composite rod also known as titanium clad copper, a certain thickness of titanium layer is coated on a copper rod, which is the main component of the metal anode. It combines the excellent conductivity of copper with the excellent corrosion resistance of titanium. It is mainly used in electrolysis, electroplating, hydrometallurgy and metal anode electrolysis cell under the condition of strong corrosion. It is a kind of high quality electrode material.
